

6.5 Similarity and Measurement

Goal: Find unknown side lengths of similar figures.

Example 1 Finding an Unknown Side Length in Similar Figures

Given $RSTV \sim WXYZ$, find VR .

Solution *Similar*

Use the ratios of the lengths of corresponding sides to write a proportion involving the unknown length, VR .

$$\frac{\text{small}}{\text{large}} \quad \frac{XY}{ST} = \frac{WZ}{RV}$$

Write proportion involving VR .

$$\frac{10}{14} = \frac{15}{x}$$

Substitute.

$$10 \cdot x = 14 \cdot 15$$

Cross products property

$$10x = 210$$

Multiply.

$$x = 21$$

Divide each side by 10.

Answer: The length of VR is **21** inches.

Checkpoint

1. Given $\triangle PQR \sim \triangle VTS$, find TS .

$$\frac{\text{Big}}{\text{Little}} \quad \frac{PR}{VS} = \frac{QR}{TS}$$

$$\frac{15}{10} = \frac{12}{x}$$

$$15x = 12 \cdot 10$$

$$\frac{15x}{15} = \frac{120}{15}$$

$$x = 8 \text{ in.}$$

Example 2 Using Indirect Measurement

Height At a certain time of day, a person who is 6 feet tall casts a 3-foot shadow. At the same time, a tree casts an 11-foot shadow. The triangles formed are similar. Find the height of the tree.

Solution

Write and solve a proportion to find the height h of the tree.

$$\frac{\text{Height of tree}}{\text{Height of person}} = \frac{\text{Shadow of tree}}{\text{Shadow of person}}$$

$$\frac{h}{6} = \frac{11}{3}$$

Substitute values.

$$h \cdot 3 = 6 \cdot 11$$

Cross products property

$$3h = 66$$

Multiply.

$$h = 22$$

Divide each side by 3.

$$\frac{6}{3} = \frac{h}{11}$$

height
Shadow

$$h = \frac{66}{3}$$

$$h = 22 \text{ feet}$$

Answer: The tree has a height of 22 feet.

Example 3 Using Algebra and Similar Triangles

Given $\triangle ABC \sim \triangle DEC$, find BE .

To find BE , write and solve a proportion.

Big
Little

$$\frac{AB}{DE} = \frac{CB}{CE}$$

$$\frac{24}{16} = \frac{30+x}{30}$$

Write proportion.

Use fact that $BC = 30+x$.

$$\frac{24}{16} = \frac{30+x}{30}$$

Substitute.

$$24 \cdot 30 = 16(30+x)$$

Cross products property

$$720 = 480 + 16x$$

Multiply.

$$240 = 16x$$

Subtract 480 from each side.

$$15 = x$$

Divide each side by 16.

Answer: The length of \overline{BE} is 15 inches.
