

## 7.6 Percent Applications

**Goal:** Find markups, discounts, sales tax, and tips.

### Vocabulary

Markup:

When a quantity is increased by a certain percentage

Discount:

When a quantity is decreased by a certain percentage

wholesale price	retail price
\$ it costs to make an item	cost it is sold for

### Example 1 Finding a Retail Price

**Pillows** A store buys decorative pillows from a manufacturer for \$2 each. The store marks up the price by 400%. What is the retail price?

**Solution** wholesale

**Method 1** Add the markup to the wholesale price.

Retail price = Wholesale price + Markup

$$\begin{aligned}
 &= 2 + 400\% \cdot 2 && \text{Substitute.} \\
 &= 2 + 4 \cdot 2 && \text{Write } 400\% \text{ as a decimal.} \\
 &= 2 + 8 && \text{Multiply.} \\
 &= 10 && \text{Add.}
 \end{aligned}$$

**Method 2** Multiply the wholesale price by (100% + Markup percent).

Retail price = Wholesale price  $\cdot$  (100% + Markup percent)

$$\begin{aligned}
 &= 2 \cdot (100\% + 400\%) && \text{Substitute.} \\
 &= 2 \cdot 500\% && \text{Add percents.} \\
 &= 2 \cdot 5 && \text{Write } 500\% \text{ as a decimal.} \\
 &= 10 && \text{Multiply.}
 \end{aligned}$$

**Answer:** The retail price of a decorative pillow is \$10.

**Example 2** Finding a Sale Price

**Backpack** You buy a backpack that is on sale for 25% off the original price of \$20. What is the sale price?

**Solution**

**Method 1** Subtract the discount from the original price. "off"

$$\text{Sale price} = \text{Original price} - \text{Discount}$$

$$= 20 - 25\% \cdot 20 \quad \text{Substitute.}$$

$$= 20 - 0.25 \cdot 20 \quad \text{Write } 25\% \text{ as a decimal.}$$

$$= 20 - 5 \quad \text{Multiply.}$$

$$= \$15 \quad \text{Subtract.}$$

**Method 2** Multiply the original price by  $(100\% - \text{Discount percent})$ .

$$\text{Sale price} = \text{Original price} \cdot (100\% - \text{Discount percent}) \quad \text{"on"}$$

$$= 20 \cdot (100\% - 25\%) \quad \text{Substitute.}$$

$$= 20 \cdot 75\% \quad \text{Subtract percents.}$$

$$= 20 \cdot 0.75 \quad \text{Write } 75\% \text{ as a decimal.}$$

$$= 15 \quad \text{Multiply.}$$

**Answer:** The sale price of the backpack is \$15.

**Checkpoint**

1. In Example 1, what is the retail price of a decorative pillow if the markup percent is 250%?

$$2 + (250\% \cdot 2)$$

$$2 + (2.5 \cdot 2)$$

$$2 + 5 = \$7$$

$$2 \cdot (100\% + 250\%)$$

$$2 \cdot 350\%$$

$$2 \cdot 3.5 = \$7$$

2. A pair of shorts that originally costs \$15 is 40% off. Find the sale price.

$$15 - (40\% \cdot 15)$$

$$15 - (0.4 \cdot 15)$$

$$15 - 6$$

$$= \$9$$

②

$$15 \cdot (100\% - 40\%)$$

$$15 \cdot 60\%$$

$$15 \cdot 0.6 = \$9$$

**Example 3** Using Sales Tax and Tips

**Pizza** You order pizza to be delivered. The bill is \$18. You give the delivery person a 15% tip. The sales tax is 5%. What is the total cost of the pizza?

**Solution**

Sales tax and tips are calculated using a percent of the purchasing price. These amounts are then added to the purchase price.

$$\begin{aligned}
 \text{Total} &= \text{Food bill} + \text{Sales tax} + \text{Tip} \\
 &= 18 + 5\% \cdot 18 + 15\% \cdot 18 && \text{Substitute.} \\
 &= 18 + 0.05 \cdot 18 + 0.15 \cdot 18 && \text{Write percents as decimals.} \\
 &= 18 + 0.90 + 2.70 && \text{Evaluate.}
 \end{aligned}$$

**Answer:** The total cost of the pizza is \$21.60

**Checkpoint**

3. In Example 3, find the total cost of the pizza if the tip is 20%.

$$\begin{aligned}
 &18 + 0.90 + 20\% \cdot 18 \\
 &18 + 0.90 + 0.2 \cdot 18 \\
 &18 + 0.90 + 3.60 = \$22.50
 \end{aligned}$$

**Example 4** Finding an Original Amount

**Blender** A store marks up the wholesale price of a blender by 25%. The retail price is \$30. What is the wholesale price?

**Solution**

Let  $x$  represent the wholesale price.

$$\text{Retail price} = \text{Wholesale price} \cdot (100\% + \text{Markup percent})$$

$$30 = x \cdot (100\% + 25\%) \quad \text{Substitute.}$$

$$30 = x \cdot 1.25 \quad \text{Add percents.}$$

$$2.25 \cdot 30 = x \cdot 2.25 / 2.25 \quad \text{Write } 1.25 \text{ as a decimal.}$$

$$\$13.33 \approx x \quad \text{Divide each side by } 2.25$$

**Answer:** The wholesale price of the blender is about \$13.33
